

# PRIVATE LABEL E-FILE SITE

## Take Your Business a Step Further with E-File

Grow your business with a **Private-Label E-File Site**, which helps boost revenue, profitability and customer retention. More and more businesses are choosing to manage mandatory 1099, W-2 and ACA filing with digital solutions like e-file and/or print and mail services. This represents a perfect sales opportunity to “close the loop” with your existing customers.

We will set up and manage the e-file site with your branding, administer payment processing and provide dedicated technical support. Now is the best time to get on board. An exciting and lucrative selling opportunity awaits.

**NEW**

### Software Data Mapping Template

Designed specifically for software users, our code-free software data mapping template prevents bottlenecks through seamless mapping of exported data. By eliminating the need to manually copy and paste data, your customers can enjoy a faster, more accurate e-file process. The software template converts data exported from your software into a compatible template for seamless uploading to your private-label e-file site.

# SOFTWARE DATA MAPPING TEMPLATE

## The Smart Solution for Seamless Data Transformation

ComplyRight provides a **FREE**, out-of-the-box integration that makes it easy for your customers to e-file. This specially designed tool converts data exported from your software into a compatible template for seamless uploading to your private-label e-file site. By eliminating the need to manually copy and paste data, end users can enjoy a faster, more accurate e-file process. All we require from you is the output files — we will then create the transformation template absolutely free.

**Request a live demo to watch a product expert show you how teams use the mapping template to:**

- ✓ Enhance efficiency and productivity by eliminating end user maintenance
- ✓ Eliminate data mapping complications from your software to the e-file template
- ✓ Support a broad range of excel file formats: txt, word, csv, xls, xlsx and more
